

HOCKWAY™

Bespoke equipment and accessories to help you manage and maintain your Cathodic Protection system

HOCKWAY™

Specialist equipment and accessories, comprehensive CP system support.

At Hockway we work with the world's leading manufacturers to supply a comprehensive range of specialist equipment and accessories to help you install, manage and maintain your Cathodic Protection system wherever it is, whatever the purpose.

Soil Resistivity Test Kit

G1 with
software overlay

Current Interrupter Relay for
higher currents

Reference Electrodes

Permanent Reference Electrodes

At Hockway we supply a range of bare and pre-packaged permanent reference electrodes.

Types available include:

- Copper Copper Sulphate suitable for freshwater or soils with low chlorides. These are for AST tank externals, pipelines, buried vessels and other buried structures with CP
- Silver Chloride suitable for seawater or soils with high chlorides. These are for AST tank internals, seawater and buried structures with CP
- Zinc for seawater

Portable Reference Electrodes

Hockway supply a range of rugged portable Copper Copper Sulphate reference electrodes for onshore and portable Silver Silver Chloride electrodes for offshore potential measurement.

Test Stations

Hockway's test stations give you durable answers to the world's toughest conditions.

Big Fink Test Station

Hockway have worked with market leaders to supply you with a test station to survive the harshest conditions.

Flush Fink Mounted Test Station

A high strength maintenance free method of testing CP.

Corrosion Coupon

Hockway's own design and manufactured Corrosion Coupon is ideal for measuring IR free polarized potentials without the need to interrupt all CP systems at the same time, i.e. no requirement for synchronized switch off.

Insulating Flange Kits

Our Insulating Flange kits are available in all sizes, types, pressure ratings and materials.

Casing End Seals and pipeline isolators

Casing End Seals for metallic and non-metallic cased crossings for any diameters and all environments. Pipeline isolators to support and separate the carrier pipes from casings.

Cable

Hockway supply a range of cable including:

- PVC/PVC (armoured or non)
- XLPE/PVC (armoured or non)
- PVDF/HMWPE
- HMWPE

Big Fink Test Stations

Splice Kits

Our high quality Splice Kits provide secure below ground cable connections that last

Connectors/Linetaps

Linetaps. To suit any size of cable and current capacity.

Cadweld

The ability of grounding circuits to protect property and personnel depends on the quality of their connections. The Cadweld exothermic system provides permanent, low-resistance connections needed for long-lasting, reliable grounding networks.

Features

- Current carrying capacity equal to the conductor
- Doesn't deteriorate with age
- Permanent molecular bond that cannot loosen or corrode over time
- Will withstand repeated faults
- Made with inexpensive, lightweight and portable equipment
- No special skills for fitting
- No external power or heat required
- Easy to check for quality by visual inspection

Coating Repair material

Hockway supply a range of coating repair material to suit your needs.

Spark Gaps

Protection from potential lightning damage in hazardous areas, in accordance with DIN VDE 0185.

Isolators

Cathodic Isolators ensure safety for people and equipment from all types of electrical disturbances, by spark arrestors and voltage protection.

Our isolators can also help you cut operating costs by protecting against AC fault currents and mitigation of induced AC across pipelines and other structures.

Pin Brazing Equipment

DC Decoupler

DC Decouplers provide protection against AC fault current's and mitigation of induced AC across pipelines and other structures.

Pin Brazing

Pin Brazing Equipment for making safe and reliable cable attachments to pipelines, tanks and other metal structures.
